Bird Migration

Wednesday, Oct. 2nd @ 6:30 PM

During Autumn, hundreds of bird species take to the skies for warmer climates. In this program we explore why birds migrate, their varying methods of migration, the latest theories on the strategies that birds use to navigate as well as a look at the challenges they face in migration, both natural and manmade. The program finishes with a discussion of the different species to keep an eye out for as they come to settle in our area for the winter or continue South to warmer climes. Please join Pete Axelrod, Education & Community Outreach Coordinator from Wild Birds Unlimited of Scotch Plains for this informative event. Registration is required.
